## ABOUT

Frontend developer with over 3 years of experience, specializing in creating modern, high-performance web applications. Skilled at working in teams ranging from 2 to 10 members, both remotely and on-site. Built full cycles of development: from gathering requirements to delivering user-friendly, scalable solutions. Expert in React and TypeScript with a focus on clean code and efficient workflows.

In addition to core frontend knowledge, I have implemented features like multilingual support, advanced state management, and optimized component design. Passionate about enhancing user experiences and improving development processes through automation and modern practices. My hobby includes mentoring junior developers, presenting tech talks, and actively learning new technologies to stay ahead in the field.

## SKILLS

- **Frontend Technologies:** *React, TypeScript, JavaScript (ES6+), Redux Toolkit, RTK Query, React Hook Form, MUI, Styled Components, HTML5, CSS3, SASS/SCSS*
- **Development Tools:** *Vite, ESLint, Prettier, Git, Jira, Figma*
- **Other Skills:** *REST API integration, Agile development, CI/CD pipelines*
- **Languages:** *Georgian (Native), Russian (Native), English (B2)*

## EXPERIENCE

### Webflow: 11/2022 - 06/2024   2 YEARS

- Built advanced admin panel features, including user data filtering, sorting, and search, leveraging Redux Toolkit and MUI.
- Integrated multilingual support via React-i18next, enabling seamless user experiences across languages.
- Developed a robust form management system using React Hook Form, including field validation with Yup and progress auto-saving with localStorage.
- Led onboarding processes for new developers, improving team productivity and cohesion.

*Technologies*: React, TypeScript, MUI, Redux Toolkit, Vite, RTK Query, ESLint, Prettier, React Router, Styled Component, React Hook Form

### SMART WEB: 01/2021 - 11/2022   2 YEAR

- Optimized mobile app performance by implementing virtualized lists, improvinguser experience.
- Integrated the Bank of Georgia API to enable seamless online purchases.
- Designed and developed authentication features, including real-time field validation and password recovery.

*Technologies*: React, TypeScript, Redux Toolkit, Vite, Styled Components, React Router, RTK Query, React-Hook-Forms

### SMART WEB: 01/2021 - 11/2022  1.8 YEARS

### WEBVALLEY: 11/2022 - 06/2024  1.8 YEARS

## EDUCATION

Ivane Javakhishvili Tbilisi State University — BACHELOR, 2016 - 2020
Information and computer science

Ivane Javakhishvili Tbilisi State University — MASTER, 2020 - 2022
Development and maintenance of a high-quality
software product

## PERSONAL BRAND

I am actively mentoring IT students, helping them build their careers in software development.
Through personalized guidance, I support them in mastering key concepts, tackling real-world
problems, and preparing for interviews. I focus on fostering a deep understanding of core
technologies and best practices while also encouraging practical skills and professional growth.
My mentorship extends beyond technical knowledge to cover areas like collaboration, career
development, and navigating the ever-evolving IT industry.
